Capped Capital Protection

Market Expectation

- Rising underlying
- Sharply falling underlying possible

Characteristics

- Minimum redemption at expiry equivalent to the capital protection
- Capital protection is defined as a percentage of the nominal (e.g. 100%)
- Capital protection refers to the nominal only, and not to the purchase price
- Value of the product may fall below its capital protection during the lifetime
- Participation in a positive performance of the underlying up to the Cap
- Any payouts attributable to the underlying are used in favour of the strategy
- Limited profit potential
