Skopos Labs®

Problem

Corporations face event-based risks and opportunities from all angles (e.g. legislation, regulation, litigation, news)

Information overload when tracking many corporations and/or events

Predicting all important event impacts accurately is impractical

No systematic method exists for predicting future impacts on specific companies

Skopos Labs

Solution: Automated Predictive Intelligence

Anticipate the events that will impact any specific corporation, in real-time.

Each **day**:

└── Each **company**:

  └── Events most likely to impact company

    └── Each **event**:

      └── Probability it's significant

      └── Probability it occurs

      └── Probability it's positive/negative
